IMPORTANT SAFETY INFORMATION - READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

WARNING - Seizures

Some people (about 1 in 4000) may have seizures or black outs triggered by light flashes, such as while watching TV or playing video games, even if they have never had a seizure before.

Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.

Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

- Convulsions
- Eye or muscle twitching
- Loss of awareness
- Altered vision
- Involuntary movements
- Disorientation

To reduce the likelihood of a seizure when playing video games:
1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

WARNING - Repetitive Motion Injuries

Playing video games can make your muscles, joints or skin hurt after a few hours. Follow these instructions to avoid problems such as Tendonitis, Carpal Tunnel Syndrome or skin irritation:

- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms during or after play, stop playing and see a doctor.

WARNING - Battery Leakage

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the correct directions. Insert the negative end first. When removing batteries, remove the positive end first.
- Do not dispose of batteries in a fire.
The year is 1890.
In an ancient castle on the outskirts of the Austrian empire, a demon lord that would violate the powers of darkness was being resurrected at the hand of a fiend yearning for chaos.

At this demonic castle, Cassilia, one of Dracula’s minions, began the incantation of a ritual to bring her lord Dracula back to life.

The vampire hunter Morris and his two apprentices, Nathan and Hugh, sensed an abnormality in the balance of nature and rushed to prevent Dracula’s unholy reemergence.

"That unholy monster must never return!"

However, they arrived too late to prevent Dracula’s return from his confinement. Dracula used his magical powers to imprison Morris, and cast Nathan and Hugh into a grayyard underneath the demonic castle.

Together the two began to search through the castle in order to vanquish Dracula and to rescue their master.

**STRATEGIES**

**Use Dual Set-up System Cards Wisely**

Use a DSS card to make the effect known. Once a combination has been used, a description of the effect will appear on the DSS screen. There are a variety of different effects possible, which include an increase in offensive, defensive, and other attributes. There are also those that contain command techniques. Do not rely on just one card but be mindful to use a variety of different cards depending on the situation at hand.

**Save Frequently**

Save often and more than anything else be cautious not to get killed, which will end the game. Keeping this up will slowly but surely make the player stronger and closer to completing the quest.

- See Save on page 13.

**Look at the Map**

Try attacking the walls surrounding any suspiciously empty spaces on the map. The walls might break away to reveal a hidden chamber.

- See page 8 for the Map Screen.

**Use the Warp Zone**

Skillfully use the warp zones scattered throughout the ancient castle. It will become easier to move to far away spots.
